

ChemiGuard[™]

Dry-Pro 1000

TYPE 5

TYPE 6

EN1073-2

A high-breathability protective coverall that efficiently blocks particles in the 3-5 micron range. Type 5 & 6

Product Details

- The fabric's middle layer consists of melt-blown polypropylene fibers, significantly enhancing protection against solid particles and liquids. The outer double-layer, high-quality polypropylene non-woven fabric adds strength, preventing tearing and punctures.
- The fabric is highly breathable, preventing the occurrence of thermal stress. It is also anti-static and complies with the EN1149-5 anti-static standard.
- Featuring a three-piece hood, butterfly sleeves, cuffs with thumb rings, an elastic waist, and a triangle crotch design, this design ensures comprehensive coverage and comfort.

Applications

- Asbestos dust treatment
- Painting work
- Radioactive particles protection in the nuclear industry
- Cleanroom environments
- General maintenance and cleaning
- Handling sensitive electronic components
- Handling infectious materials in laboratory settings

Industries

Automotive

Chemical

Pharmaceuticals

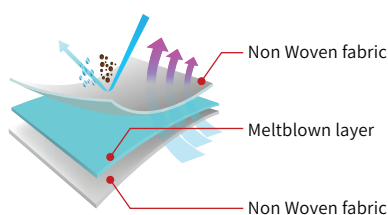

Electronics

Manufacturing

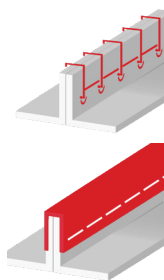

Fabric Technology

Multilayer SMS fabric

Seam Structure

- Reinforced four-line stitching
- Stitch length: 3-4 stitch per CM
- Elegant and Sturdy
- Hard to crack

Packaging Information

1 Piece / Polybag

50 Piece / Carton

Carton Dimension - 52x38x40 cm

Carton Weight - 10.10 kg / 22.26 lbs
