

Nitrile Glove

DG21121

Features

- Single use only
- Beaded cuff
- Latex Free and BPA Free
- Touch screen compatible
- Ambidextrous fit
- Powder Free
- Easy to wear and remove

They offer good chemical resistance and anti-static protection. These Blue Nitrile Gloves are made of 100% nitrile material and do not contain protein, which effectively avoids protein allergies. These are powder-free and made with an allergy-free compound that is stronger and comfortable to wear compared to latex gloves.

Applications

- Nitrile gloves are mainly used in medical treatment, hygiene, beauty salons, food processing, factory repairs and other operational industries.
- These gloves give a barrier of protection against risks associated with the transmission of germs, blood-borne pathogens, and other environmental contaminants.
